

IDP in BFSI

For a futuristic and resilient technology solution

Intelligent Document Processing (IDP): Elevate profits and customer experience in BFSI

In this neo-normal world, the Banking and Capital sector is witnessing unprecedented challenges especially with profit compression and revenue leaking out to other players in the market. To elevate and set their business for more profit and growth, organizations need to find ways to reduce expense and generate more revenue.

With our IDP solution, you can revolutionize your financial operations. Transform all your unstructured data and streamline your processes for frictionless customer experiences. Focus on more essential value-add tasks and leave the document processing to the experts.

Where do we make a difference?

Seamless customer onboarding process

Claims document processing

Extraction and validation of customer information with speed and accuracy

Classification and extraction of mortgage applications

Extraction of challenging data like handwritten notes

HOW DO YOU BENEFIT?

- ✓ Improved productivity and reduced operational expenses
- ✓ Immediate return on investment
- ✓ Faster turnaround time
- ✓ High data accuracy
- ✓ Complete security
- ✓ Seamless integration capabilities
- ✓ Minimized human contact with sensitive data
- ✓ Compliance with stringent regulations

We are a content tech company and we understand content like no other! With our AI-based IDP solution, supercharge your document processing with fast-tracked productivity and innovation.
