IDP in Government Agencies

For a futuristic and resilient technology solution

Intelligent Document Processing (IDP): Helping the government sector drive transformational changes

The last couple of years have been tumultuous for the government and public sector across the world not only because of COVID-19 but also because of the major economic and social disruptions that came with it. The years 2020-2021 have demonstrated the urgent requirement for advancing digital transformation.

Most federal agencies are bogged down with an ever-increasing volume of documents most of which are offline. With heavy reliance on unstructured data and manual processing, gathering relevant insights can be an overwhelming and time-consuming endeavour.

Our Intelligent Document Processing (IDP) solution is designed to extract data from all kinds of documents including handwritten forms, PDFs, and low quality tables or images and efficiently process them at scale.

Where do we make a difference?

Survey data capture and analysis

Application verification - property registration

Permit issuance

E-PASS

E-pass generation

How do you benefit?

- Improved productivity and reduced operational expenses
- Immediate return on investment
- Faster turnaround time
- High data accuracy
- Unmatched speed and scale
- Complete security
- Seamless integration capabilities
- Minimized human contact with sensitive data
- Compliance with stringent regulations

We are a content tech company and we understand content like no other! With our AI-based IDP solution, supercharge your document processing with fast-tracked productivity and innovation.

Schedule a demo and we'll help you find a solution that's just right for your organization.
